INDIA: New achievement for CAMU

Camu srl gets other 2 orders for High Performance Slitting Lines for high thickness for India, from one of the largest ERW Tube Manufacturers in India ; and the fastest growing tube company ; M/s APL APOLLO Tubes Ltd. This is a repeat Order ! within one Year !! Customer Patronization is always been the keep business motto for CAMU.

This represents certainly a competitive success out of the order for CAMU (www.camu.it). Always offering " Value for Money" with High Quality, Reliability and Competitive Pricing.

For the steel market this is a real big success that the Italian company has reached, consolidating its leadership in this technology around the world.

Other precedent good results in this sector were obtained recently in Italy and Mexico.

"The demand for high thickness – says Loris Basso – is not new for Camu, but it has gradually established thanks for the interest and appreciation that Steel Centres continue to show to our company.

Today the Service Centres around the world demand productivity, flexibility and ease to use.

The need for better technology is now spreading also in developing countries because the maximum efficiency in production is an essential requirement for every company.

The recognition of surplus value that CAMU is able to give to Steel Centres is our greatest incentive to continue to innovate. For this reason we are very happy to get also this 2 orders".

Today focus on surplus value for the customer is the most important thing in order to have the best technology and surpass the traditional references of characteristics and performance.

CAMU knows that the surplus value is what Steel Centres need, in order to turn the same value to their customer operating in globalization. Skills and strong know how in technological proposal are necessary to generate surplus value.

Surplus value is represented from:

- Automatic tool change estimated time 4 minutes
- Special hydraulic system for locking / unlocking blades highly functional and reliable;
- Mobile tension bridle with felt and rubberized rolls.
- The unloading strip system of recoiler without previously strapping.

General features:

SLITTING LINE
